- **New Function Recommends!**

About Secret Space

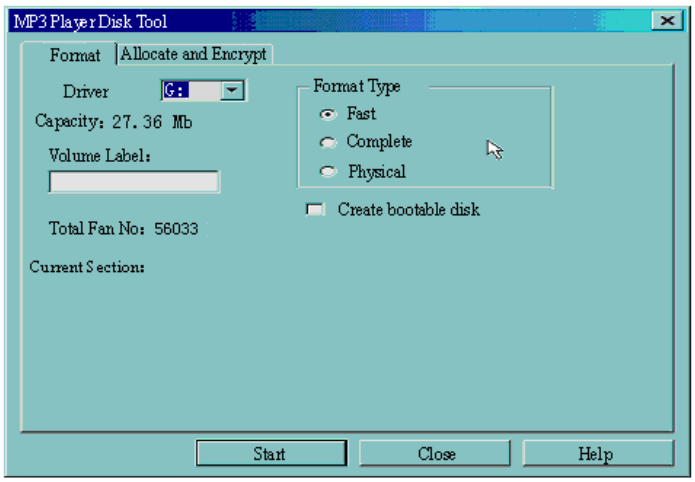
Some MP3 user may worry about divulging secret. They do not want others to find private information contained, therefore these data have to be removed before lend their own MP3 to others. It makes some trouble.

However, this problem has totally solved by 'Secret Space' technique!

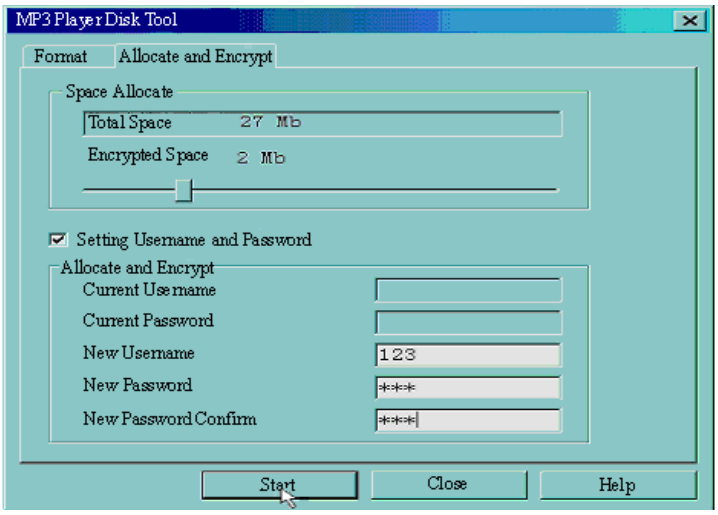
You can use provided software to divide the whole USB disk into two parts, and encrypt one of them. You can move your privacy into the encrypted part; they will be protected by password.

To active 'Secret Space':

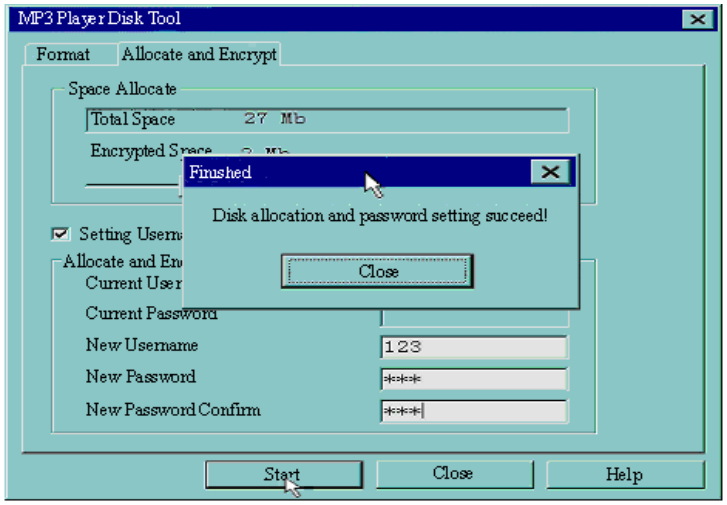
1. Connect your player to PC
2. Run *MP3 Player Disk Tool* which can be found in provided CDROM



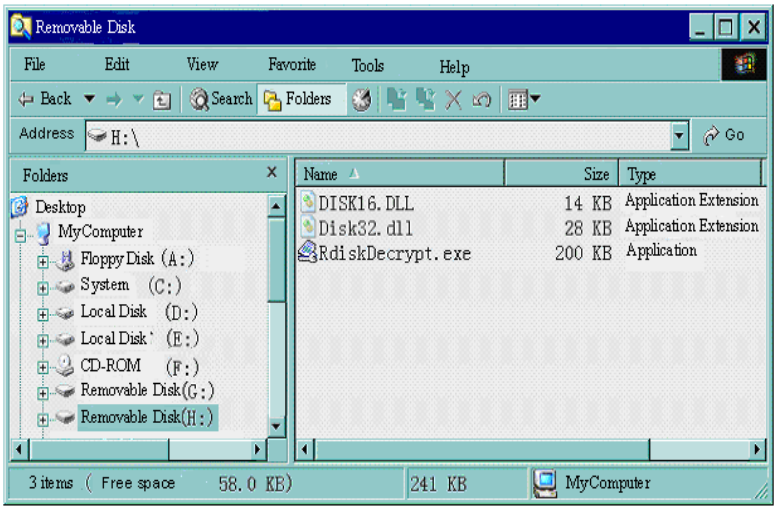
3. Click 'Allocation and Encrypt' card, Allocate appropriate space and set username and password, and then click Start.



4. After space allocation, shown as below:

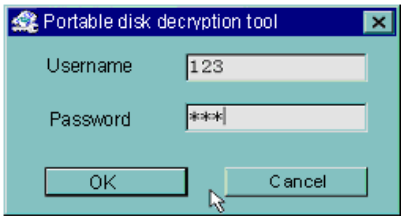


5. Click ‘OK’ to restart.
6. After restart you will find two disks (only one disk can be seen on Windows 2K SP4or prior), click the encrypted disk (the second one), you will find three files, two are hidden, one is executable



7. Running executable file ‘RdiskDecrypt.exe’ and input username and password. If all are correct, disk

will be opened, and files can be copied into.



8. You must enter username and password each time access encrypted disk.

Warning: Divide one disk into parts will remove all data, and so does combine process.

Warning: Please remember username and password. If you forget it, you can only making combine processing and you will loss all encrypted data.

●Troubleshooting

No Power	Check if battery had installed properly Make sure you have switched the player on
No Sound	Make sure volume is not on 0 position and the connection to earphone is valid Please make sure the earphone is clean Damaged MP3 files may have noise and even cannot be played
Strange characters on display	Make sure you have chose correct language
FM has bad performance	Adjust place of player and earphone Switch off power appliance nearby Earphone can be used as antenna
Cannot Download Music	Check USB cable, and make sure the player is properly connected to the PC Check if the driver has well installed Make there is still blank memory
